Dear Caleb

This letter confirms that you attended the 3rd Joint Congress on Evolutionary Biology held virtually June 27-28, 2024, and in-person July 26-20th, 2024, as an in-person attendee, and presented the following talk:

'Can machines think (like biologists)? The promises and pitfalls of AI for accelerated phenotypic discovery from images'

The conference is the joint academic meeting of the Society for the Study of Evolution (SSE), the Society of Systematic Biologists (SSB), the American Society of Naturalists (ASN), and the European Society for Evolutionary Biology (ESEB), and is the premier opportunity for the presentation and discussion of scientific research in all areas of evolutionary biology.

Your participation and expertise made the conference a great experience for attendees, and we hope to see you again in future years.

Sincerely,

Alex Wong
